RACING FRICTION PLATES

The material has unique characteristics that guarantee excellent performance even during the most severe use. The friction material does not contain rubber or cork hence reducing the problem of sticking or slippage.

Ferodo recommend that new friction plates are immersed in engine oil for two hours before use. This allows the material to absorb oil which increases the life of the component.

Note: The racing plates consist of two standard plates that must be mounted one at each end of the clutch set.

DISCHI FRIZIONE RACING

Il materiale utilizzato possiede caratteristiche uniche che permettono alle frizioni Ferodo di avere performance eccellenti anche nelle condizioni di utilizzo più difficili. Il materiale d'attrito non contiene sughero o gomma, evitando in questo modo qualsiasi problema di incollaggio e slittamento.

Ferodo raccomanda che i nuovi dischi frizione vengano immersi per un paio d'ore in olio motore prima di essere utilizzati. Questo permette al materiale di assorbire una certa quantità d'olio incrementando così la vita del componente.

Nota: la serie dischi conduttori racing comprende due dischi standard che devono essere montati uno all'inizio e l'altro alla fine della serie.

MOTORSPORT-UPPLUNGSSCHEIBEN

Das verwendete Material gewährleistet auch unter höchster Beanspruchung beste Leistung. Das Reibmaterial beinhaltet weder Kork noch Gummi, dadurch gibt es kein Verkleben und Rutschen.

Ferodo empfiehlt, die neuen Kupplungsringe einige Stunden vor Erstbenutzung in ein Ölbad zu legen. Dadurch kann das Öl ins Material eindringen und steigert die Lebensdauer.

Merke: Der Kupplungsscheibensatz enthält zwei Standard Ringe, wovon eine am Anfang und eine am Ende des Kupplungspaketes montiert wird.

Ferodo clutch components are manufactured to the highest European quality standards and utilise only premium quality materials.

DISCOS DE EMBRAGUE RACING

El material utilizado posee características únicas que permiten que los embragues Ferodo tengan unas prestaciones excelentes incluso en las condiciones de utilización mas severas. Los materiales de fricción no contienen ni corcho ni goma, evitando los posibles problemas de despegue o arrastre.

Ferodo recomienda que antes de montar los discos de embrague, se sometan estos a un baño de aceite de motor durante 2 horas aprox. De esta forma el material puede absorver una cierta cantidad de aceite que proporcionará una mayor vida a los discos de embrague.

Nota: La serie de discos de compuesto racing incorporan 2 discos estándar que se deben de montar uno al inicio y otro al final del paquete de embrague.

DISQUES D'EMBRAYAGE RACING

Le matériau utilisé possède des caractéristiques uniques qui permettent aux embrayages Ferodo de maintenir d'excellentes performances, même dans les conditions d'utilisation les plus difficiles. Le matériau de friction ne contient ni liège, ni caoutchouc, évitant ainsi toute possibilité de collage et de patinage.

Ferodo recommande que les nouveaux disques soient immergés pendant deux heures dans de l'huile moteur avant d'être utilisés. Ceci permettra au matériau de friction d'absorber une certaine quantité d'huile afin d'augmenter la durée de vie du produit.

Note: La série de disques garnis de matériau de friction racing comprend deux disques standards qui doivent être montés, l'un au début et l'autre à la fin de la série.
